Simulation protocol.

- 1. Choose randomly: LMD, RE, or EX.
- 2. Simulate the chosen, collecting 50 samples of:

LMD: pressure, P, and $\{R_e\}$

RE: number of ionized segments, $N_{\rm A^-}$

EX: number of salt ions, $\textit{N}_{\rm Na^+}$ and $\textit{N}_{\rm Cl^-}$

Check the autocorrelation of each samples array. Pearson coefficient must be < 0.2.

Repeat collecting at least 200 averages from each process.
